SUMMARY

Computer Science graduate with 6 months of Software Developer internship experience in backend and full-stack development. Built and integrated a 5-module Import Export ERP System using Java, JDBC, MySQL, and JSP, owning the Product Management module and leading end-to-end integration. Optimized database queries through indexing and query restructuring, improving database performance and application responsiveness. Experienced in backend development, REST APIs, database-driven applications, authentication, event-driven processing, caching, and debugging.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript
- **Backend:** Spring Boot, Spring Security, REST APIs, JDBC, JPA/Hibernate, JSP
- **Database:** MySQL, PostgreSQL, SQL
- **Frontend:** React, HTML5, CSS3, Bootstrap
- **Tools & Technologies:** Git, GitHub, Maven, Postman, Docker, JUnit, Flyway, Redis, Apache Kafka
- **Core CS:** OOP, Collections Framework, Multithreading, Exception Handling, DSA, DBMS, Operating Systems

WORK EXPERIENCE

Software Developer Intern | SDAC | Jun 2025 – Jan 2026

- Collaborated in a 5-member team to develop and integrate a web-based Import Export ERP System comprising Login, Profile, Product, Order, and Report modules.
- Owned the Product Management module and handled end-to-end integration of all 5 modules, ensuring reliable data flow across application components.
- Developed and tested backend functionality using Java, JDBC, MySQL, and JSP, working with SQL queries and database-driven application workflows.
- Troubleshot application issues by reproducing errors, debugging application logic, analyzing database queries, and implementing fixes to improve system reliability.
- Optimized MySQL queries through indexing and query restructuring, improving database performance and application responsiveness.

PROJECTS

Scalable Multi-Tenant B2B SaaS Backend

Java 21, Spring Boot, Spring Security, JWT, PostgreSQL, JPA/Hibernate, Redis, Kafka, Flyway, React, Axios, Docker

- Developed a multi-tenant SaaS platform with Spring Boot REST APIs for authentication, tenant, user, subscription, and workspace management.
- Built and tested REST API endpoints, handling HTTP requests/responses and JSON-based communication between frontend and backend services.
- Implemented tenant-aware authorization, JWT authentication, and role-based access controls for secure API access and user management.
- Troubleshot API and database issues using Postman, application debugging, PostgreSQL queries, and JUnit tests.
- Implemented PostgreSQL persistence with JPA/Hibernate and version-controlled database schemas using Flyway migrations.

High-Throughput Distributed Ledger & Wallet System

Java 21, Spring Boot, Kafka, Redis, PostgreSQL, JPA/Hibernate, React

- Developed REST APIs for authentication, wallet management, deposits, transfers, and transaction tracking using Spring Boot.
- Implemented JWT-based authentication, Spring Security, BCrypt, and role-based API access controls.
- Implemented idempotency controls to prevent duplicate transaction processing and improve API reliability.
- Used Apache Kafka for asynchronous event processing and Redis caching for low-latency data access and reduced database load.

EDUCATION

Thakur Ramnarayan College of Arts & Commerce

Bachelor of Science in Computer Science | 2023 – 2026

PUBLICATION & TRAINING

- **Research Paper Publication:** "Quick AI - A Web-Based SaaS Platform," *Undergraduate Insights: Contemporary Research from IT & CS Students* (ISBN: 978-81-985429-7-7), Sep 2025
- **Java Business Application Training** – EduPyramids, IIT Bombay
- **SDAC | 6 Months Software Developer Internship Certification**
